Dedicated to excellence in orthopedic care

The physicians at Southern California Orthopedic Institute are passionate about helping patients improve their quality of life through expert and high-quality care. Focused entirely on providing musculoskeletal treatment to people of all ages and walks of life, the Institute has 34 board-certified/board-eligible, internationally renowned physicians on staff, making it one of the largest private practices on the West Coast.

Institute doctors are leaders in their fields who contribute to clinical research, product development and educating other medical professionals about orthopedic diseases and disorders. Headquartered in Van Nuys, the Institute has seven clinics throughout Southern California. This year, 10 of its physicians were named to *Super Doctors*[®].

David M. Auerbach, MD specializes in traumatic, reconstructive, arthroscopic and microsurgery of the hand, wrist, elbow and shoulder.

Richard D. Ferkel, MD specializes in orthopedic surgery and sports medicine. He concentrates on arthroscopic and reconstructive surgery of the shoulder, knee, foot and ankle.

Robert Gazmarian, MD specializes in sports medicine, physical medicine and rehabilitation, spine care and electrodiagnostic medicine.

Mark H. Getelman, MD specializes in arthroscopic and minimally-invasive reconstructive surgery of the shoulder and knee and sports medicine.

Carlos A. Guanche, MD, an expert in hip and shoulder arthroscopic surgery who also specializes in complex shoulder reconstructions.

Todd J. Molnar, MD takes a nonsurgical approach to treating orthopedic injuries, focusing on physical medicine, rehabilitation and sports medicine.

Steven A. Schopler, MD specializes in spinal disorders, scoliosis, spinal reconstructive surgery and minimally-invasive spine surgery.
